

KUNUK

WHITEPAPER

The crypto universe has grown considerably in size, and the crypto community is already quite capable of changing presidents. The time is coming when it is worth doing truly noble deeds. For example, conquering and giving freedom and independence to the island of Greenland!

The KUNUK cryptocurrency project is designed to last for years. The first phase of the project will take place in 2025-2029. And even if Greenland does not gain freedom and independence or gains it before this date...
the project will have an amazing continuation.
